

REHFUSS CLEANNESS

Efficient and powerful drive technology in
„Hygienic Design“

success based on
quality and reliability

rehfuss.com

EASY TO CLEAN AND HYGIENIC

For use in the food industry, pharmaceutical technology and chemical industry drives have to be constructed absolutely hygienic and easy to clean. This characteristic is also called "Hygienic Design". Cooling fins and other interfering edges are absolutely unwanted. Rehfuß offers with the Cleanness product range optimal solutions which meet the highest EHEDG standards. The drives are available in aluminum – with a special coating system – as well as completely in stainless steel.

Can be combined with our smooth body motor Aluminum SBA:

Worm gearbox with
Smooth-body-motor Alumi-
num SBA

Helical gearbox with
Smooth-body-motor Alumi-
num SBA

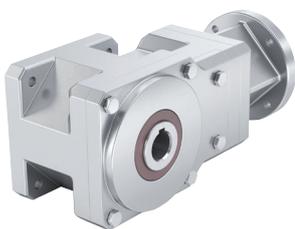

Shaft mounted gearbox with
Smooth-body-motor
Aluminum SBA

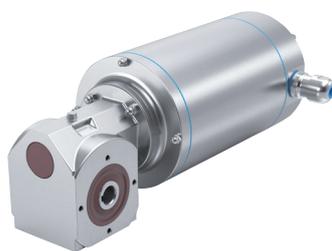

Smooth-body-motor
Aluminum SBA

Stainless steel version:

Bevel helical gearbox
KS210

Worm gearbox with
Smooth body motor

Stainless steel motor
SBH

Stainless steel motor
SBE
